

Master Summary Report

主检报告

Patient: Lei Zhu (Clark) · Male · DOB 1992-06-23 | Exam date: 2026-04-01 | Southwest Hospital Health Management Center, Chongqing | Check-up ID: 8002262907

Key Findings & Recommendations / 主要问题与建议

1 Mixed hyperlipidaemia (混合型高脂血症)

Advice: Low-fat, low-calorie diet; limit animal fats, organ meats and seafood; abstain from alcohol; increase exercise; lipid-lowering medication under physician guidance if required; monitor blood lipids.

建议：低脂、低热量饮食，限制动物油、动物内脏、海鲜等食物，忌酒，多运动，必要时在医师指导下服用降脂药物，随访血脂。

2 Overweight (BMI = 25.5 kg/m²) (体重超重 (BMI=25.5kg/m²))

Advice: Control diet (low salt / fat / sugar), eat more vegetables and fruit, exercise appropriately, and lose weight gradually (0.5–1.0 kg per month). Normal BMI is 18.5–23.9.

建议：控制饮食，低盐、低脂和低糖饮食，多食蔬菜水果，适当活动，逐渐减轻体重 (0.5 - 1.0kg/月)。

3 Liver steatosis — CAP elevated (≥292, SEVERE) (肝脂肪变测定CAP值偏高 (≥292) (重度))

Advice: CAP ≥292 dB/m suggests hepatic fat ≥67%. Abstain from alcohol, increase activity, control weight, reduce fatty/high-cholesterol foods, eat more vegetables, fruit and fibre; follow up with liver ultrasound and liver function tests.

建议：忌酒，多活动，控制体重，少吃含脂肪及胆固醇较高的食物，多吃蔬菜、水果和富含纤维素的食物，随访肝脏B超及肝功能。

4 Elevated ALT and AST (liver enzymes) (谷丙转氨酶(ALT)偏高; 天门冬氨酸氨基转移酶(AST)偏高)

Advice: Abstain from alcohol, avoid over-exertion, low-fat diet, follow up liver function; hepatoprotective treatment if needed.

建议：忌酒，避免过分劳累，低脂饮食，随访肝功，必要时保肝治疗。
